**DETAILED ACTION**

**Claims 17-35 are pending.**

***Election***

This application contains claims directed to the following patentably distinct species: the bicyclic compound of the formula I. The species are independent or distinct because due to significant variation in the claimed genus compound, a comprehensive search of any one compound would not necessarily be a coextensive search for any one or more of the other compounds. All constituents on the generic formula of the elected compound must be identified.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 17-35 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
